Residents in Wisconsin
Adult Correctional Facilities
on December 31, 1984
With Five-Year Trends for 1980-1984

On December 31, 1984 Wisconsin's Division of Corrections was responsible for an adult offender resident population of 4,845 persons, 4,632 males and 213 females, a slight increase (3.1 percent) over the previous year when 4,700 persons were present. The majority (90.9 percent) were confined in facilities operated by the Division of Corrections with a small portion (3.1 percent) in the Wisconsin Resource Center which is operated by the Division of Care and Treatment Facilities. The remainder (6.0 percent) were housed, under contract, in correctional facilities operated by the state of Minnesota, the Federal Bureau of Prisons, the Milwaukee County House of Corrections, and other county jails in Wisconsin. The map and key which precede this text will provide the reader with information about the location and security level of the various facilities operated by the Division of Corrections.

Information about the admission status (new adult sentence, adult mandatory release violator, etc.) can be found in Table 1 while Tables 2 through 15 are designed to provide the reader with information about the social and demographic characteristics of those in residence. Seventy four persons noted in Table 1 have been excluded from the remainder of the tables and the discussion. These include 46 males and 1 female institutionalized to await the outcome of probation, parole, or mandatory release revocation hearings, 1 male who voluntarily returned from parole supervision, and 26 males serving alternative to revocation contracts. Trend data for the period 1980-1984 can be found in Tables A and B and the resident population by county of commitment is depicted in Maps A and B.

TABLE A
Selected Characteristics of Adult Male Residents
on December 31, 1980-1984

	1980	1981	1982	1983	1984
Males in Residence on December 31	3,655	4,093	4,451	4,497	4,632

Assaultive, sex, and drug offender	-	-	-	-	-

Two hundred and thirteen females were in residence on December 31, 1984; an increase of 4.9 percent over 1983 levels as well as a high for the five-year period. Nine of 10 (89.1 percent) of the females in residence on December 31, 1984 had been received at the institutions as new admissions. Over two-thirds (68.6 percent) were sent to the institution from counties in the Southern, Southeastern, and Milwaukee Regions; i.e., the southern one-third of the state. Thirtytwo out of the state's 72 counties (44.4 percent) had no representation in the December 31, 1984 resident population. (See MAP B and Table 6.) Slightly more than on-half (54.3 percent) of the residents were reported to be white including 9 (4.3 percent) who came from Hispanic ethnic and cultural backgrounds. The proportion of females reported to be from non-white backgrounds decreased to a five-year low of 45.7 percent on December 31,1984. The average (median) age which stood at a low of 27.0 years in 1981 increased steadily reaching a high of 29.0 years in 1984. An increase was also noted in the average (median) length of sentence from a low of 3.8 years in 1982 to a five-year high of 4.8 years in 1984.

The proportion of females who were not assaultive, sex, or drug offenders dropped from a five-year high of just over one-half (51.2 percent) on December 31, 1983 to 45.2 percent on the same day in 1984. Those considered as being solely sex offenders made up less than one percent of the December 31, 1984 resident population while those institutionalized only because of drug offenses made up less than one-tenth of the population; an increase over the five-year low of 6.0 percent recorded on December 31, 1983. Females designated exclusively as assaultive offenders accounted for somewhat over two-fifths (43.4 percent) of the December 31, 1984 resident population; a high for the five-year period.

N = 212 females. One female held pending revocation hearing has been excluded.

The adult male resident population rose to a five-year high of 4,632 on December 31, 1984; an increase of 3 percent over the previous year when 4,497 residents were present. The smallest increase during the five-year period was 1 percent, from 4,456 to 4,497, between December 31, 1982 and December 31, 1983; the largest, the 12.0 percent from 3,655 on December 31, 1980 to 4,093 a year later. Eight out of 10 males in residence on December 31, 1984 were reported to be new admissions, a proportion that has remained constant since 1980. This group includes males who received new sentences from the court, juvenile aftercare violators who were given new adult sentences, and adult probation violators admitted with or without new sentences. Almost three-fourths (72.2 percent) of the residents had been committed to the institution from the 19 counties that comprise the Southern, Southeastern, and Milwaukee Regions. All of the states 72 counties were represented in the resident population with commitments from five counties, Milwaukee (1,719 cases), Kenosha (302 cases), Racine (293 cases), Dane (283 cases), and Rock (221 cases) accounting for just over three-fifths (61.8 percent) of the population. See MAP A and Table 6 for further information about the geographic origins of the resident population.

Approximately two-fifths (39.9 percent) of the males in residents on December 31, 1984 were reported as being from non-White famiy backgrounds; a low for the five-year period. The proportion of residents with Hispanic ethnic and cultural backgrounds remained very small, less than one-tenth (5.9 percent) on December 31, 1984. The average (median) length of sentence remained at 6.0 years while the average (median) age rose slightly from 26.7 years on December 31, 1983 to the current 27.0 years.

The proportion of males who were not categorized as assaultive, sex, or drug offenders dropped from a five-year high of 40.2 percent in 1983 to a low of 37.7 percent on December 31, 1984. As in previous December 31 male resident populations, those considered to be solely sex offenders made up less than one percent of the population while those categorized only as drug offenders accounted, as in the past, for less than one-tenth (4.8 percent) of the group. Assaultive offenders, or assaultive offenders who also happened to be sex and/or drug offenders made up almost three-fifths (57.0 percent) of those in residence on December 31, 1984. Those regarded solely as assaultive offenders accounted for somewhat less than two-fifths (37.7 percent) of the population; a decrease from the high of 40.2 percent reported the previous December. The proportion of males found to be sexual as well as assaultive offenders rose from the five-year low of 13.7 percent recorded in 1983 to 16.1 percent in 1984. As in the year just preceding, less than one percent (0.2 percent) of the population on December 31 was reported to be made up of males considered to be assaultive, sex, and drug offenders.

Offenders Admitted to
Wisconsin Adult Correctional Institutions
Calendar Year 1984

This publication is designed to provide the reader with information about the 2,503 persons, 1,956 first and 547 readmissions, who entered Wisconsin's correctional institutions for adult offenders during calendar year 1984 to serve sentences handed down by courts throughout the state. These figures represent a slight increase (1.5 percent) over 1983 levels when 2,466 persons were admitted. An additional 317 persons who also entered the institutions during 1984 have been excluded from consideration in this bulletin and are therefore only noted in Table 1. These include 99 males and 2 females institutionalized under alternative to revocation contracts, one male who returned voluntarily from parole supervision, 198 males and 16 females who were held in state-operated correctional facilities while awaiting the outcome of probation, parole, mandatory release, and special action early release revocation hearings, and one male who was admitted in error. The statistical tables accompanying the text are arranged so that comparisons can be made between males and females as well as first and readmissions. These tables (2 through 18) contain a variety of descriptive information including offense, length of sentence, age at admission, etc. A visual depiction of the geographic locations from which males and females were first and readmitted during calendar year 1984 can be found in Maps A and B.

It seems advisable, prior to discussing those persons admitted during calendar year 1984 to define what is meant by the terms "first" and "readmission." There are three different types of first admissions. One is those people who were, at the time of sentencing, not already under some type of Division of Corrections supervision; i.e., they were not already on probation, parole, or mandatory release status and are therefore categorized as new adult sentences. The second group is made up of persons who violated the terms of probation supervision, were revoked, and were sentenced to incarceration as probation violators either with or without new sentences. The third group is composed of persons who were under juvenile aftercare supervision, were found to be in violation, and who then received new sentences as adult offenders. Readmissions are those individuals released from Wisconsin's adult correctional facilities on parole, mandatory release, or special action early release who violated the terms of supervision and who were reinstitutionalized either with or without additional sentences.

Male First Admissions

Dodge Correctional Institution, the reception center for all males sentenced to Wisconsin's institutions for adult offenders, reported a total of 1,821 first admissions during calendar year 1984; just 16 less than the 1,837 recorded during 1983. Approximately three-fifths (63.1 percent) were classified as first admissions with new adult sentences while the remainder, excluding one male reported as being a juvenile aftercare violator with a new adult sentence, were either probation violators with (18.2 percent) or without (18.6 percent) new adult sentences. Males first-admitted during 1984 had most often been convicted of and sentenced for unarmed burglary (29.2 percent), theft (7.8 percent), unarmed robbery (6.8 percent), first degree sexual assault (6.7 percent), and armed robbery (6.4 percent). The average (mean) length of sentence, excluding those first admissions with life sentences, was 63.7 months while the median was 42.5 months. Males institutionalized for unarmed burlgary were reported as having an average (mean) sentence of 48.2 months while those sentenced for theft, unarmed robbery, first degree sexual assault, and armed robbery were

admitted with average (mean) sentences of 35.4, 60.1, 153.9, and 101.9 months respectively. Just over one-half (53.0 percent) of those first-admitted in 1984 were not considered to be assaultive, sexual, or drug offenders. Males classified solely as assaultive offenders accounted for one-fourth (25.3 percent) of 1984's first admissions while somewhat more than one-tenth (13.9 percent) were considered to be both assaultive and sexual offenders. Those categorized as sex offenders only made up less than one percent of the group while males regarded solely as drug offenders accounted for less than one-tenth (6.8 percent) of 1984's first admissions. Males committed from Milwaukee (522), Kenosha (138), Racine (120), and Dane (116) counties accounted for roughly one-half (49.2 percent) of the year's first admissions. Two-thirds (66.0 percent) of the first admissions came from the 19 counties that make up the southern one-third of Wisconsin.

The majority (72.7 percent) of the males who entered the institutions during 1984 were less than 30 years of age. In fact, less than one-tenth (8.1 percent) were age 40 or older at the time of admission. The average (mean) age was computed to be 26.2 years, the median, 24.0 years. Males from White racial backgrounds made up two-thirds (66.3 percent) of the year's first admissions, while those from Black and Native American backgrounds accounted for about three-tenths (29.8 percent) and less than one-tenth (3.3 percent) respectively. Ninety-nine males (5.4 percent) came from families with a Hispanic ethnic and cultural heritage. Less than one-fifth (16.4 percent) were married at the time of admission, while almost two-thirds (64.2 percent) had never been married. One-fifth (20.3 percent) of the males were reported as having a record of military service.

Male Readmissions

The number of males received at the institutions as parole, mandatory release, and special action early release violators rose from 487 in 1983 to 518 during calendar year 1984; an increase of 6.4 percent. About two-fifths (38.6 percent) of the males were returned to the institution from supervision in the field with new sentences, while the remaining three-fifths (61.4 percent) were received as violators without a new sentence. The offenses for which males were most often readmitted were unarmed burglary (35.1 percent), armed robbery (10.0 percent), and unarmed robbery (8.5 percent). The average (mean) sentence computed for readmitted males was found to be 90.6 months; the median, 71.3 months. Males sentenced for unarmed burglary, armed robbery, and unarmed robbery were found to have average (mean) sentences of 73.5, 155.3, and 54.1 months respectively. Males' not considered to be assaultive, sex, or drug offenders accounted for just over one-half (52.5 percent) of those readmitted during calendar year 1984. Those found to be both assaultive and sexual offenders made up just under one-tenth (9.4 percent) of the readmissions, while males categorized as solely assaultive offenders made up slightly more than three-tenths (31.9 percent) of the group. Males committed from five counties, Milwaukee (210), Dane (42), Racine (38), Rock (32), and Kenosha (31), made up two-thirds (67.6 percent) of 1984's readmissions.

The average (mean) age for males readmitted in 1984 was found to be 28.8 years; the median, 26.0 years. Almost two-fifths (37.6 percent) of the males were aged 20 through 24 years, while one-fourth (24.5 percent) were between the ages of 25 through 29 years. Somewhat more than one-half (56.5 percent) were reported to be White, while just under two-fifths (38.7 percent) were Black. The remainder (4.8 percent) were from Native American backgrounds. Twenty-one (4.0 percent) were reported to be from families with a Hispanic ethnic and cultural background. Eight out of 10 (83.3 percent) were single at the time of admission

with almost two-thirds (64.5 percent) reported as having never been married. Less than one-fifth (18.0 percent) had a record of some type of military service. Two-fifths (40.3 percent) had a record of at least two previous felony convictions.

First and Readmitted Females

Taycheedah Correctional Institution, Wisconsin's correctional facility for the adult female offender, admitted 164 females during calendar year 1984; an increase of 15.5 percent over the previous year when 142 persons entered the facility. The proportion of first-admitted females decreased from 88.7 percent in 1983 to 82.3 percent in 1984 while the proportion of readmissions increased from 11.3 to 17.7 percent during the same time period. The three offenses for which first-admitted females were most often sentenced were forgery (23.0 percent), theft (14.2 percent), and other drug offenses (8.9 percent). Readmitted females were most commonly sentenced for forgery or theft (20.7 percent), fraud and unarmed robbery (10.3 percent), and unarmed burglary (6.9 percent). The average (mean) length of sentence for first admissions was found to be 51.7 months; that of readmissions, 55.7 months. Median lengths of sentences for first and readmissions were computed to be 38.3 and 51.9 months respectively. Information for offenders who received life sentences are not included in these computations. First admisssions sentenced for forgery were found to have received average (mean) sentences of 39.3 months while those convicted of theft or other drug related offenses had average (mean) sentences of 28.6 and 29.0 months respectively. Females readmitted on forgery or theft charges received average (mean) sentences of 66.0 and 60.3 months. Almost three-fifths (58.5 percent) of the first-admitted females had been convicted for offenses which did not categorize them as assaultive, sex, or drug offenders; a fact which was also true for roughly two-thirds (65.5 percent) of the females readmitted during calendar year 1984. First admissions from Milwaukee (33 cases), Kenosha (15 cases), Dane (12 cases), and Racine (8 cases) accounted for one-half (50.6 percent) of this type of admission during calendar year 1984. One-half (50.6 percent) of the females readmitted were committed from Milwaukee (10 cases) and Racine (8 cases) counties. Just over three-fifths (63.2 percent) of the first and about seven-tenths (69.1 percent) of the readmissions during calendar year 1984 were sent to the institution from the 19 counties that make up the southern third of Wisconsin.

Females first admitted during 1984 were found to have an average (mean) age of 27.7 years; readmissions were slightly older with the mean age found to be 29.1 years. The median age for those classified as first admissions was 26.8 years with readmissions again being slightly older with a median age of 28.0 years. Three-fifths of the females first admitted in 1984 were classified as White, while just over one-third (34.0 percent) were reported to have come from Black family backgrounds. The majority (58.6 percent) of the readmissions were from Black backgrounds with the remainder being classified as White. Seven first and one readmission came from families with a Hispanic ethnic and cultural background. Just over one-fourth (27.4 percent) of the females who were first admitted in 1984 were married as were less than one-fifth (17.3 percent) of the readmissions. Slightly more than two-fifths (43.7 percent) of the first admissions and almost one-half (48.3 percent) of the readmissions had never been married.

Offenders Released From
Division of Corrections Adult Institutions
Calendar Year 1984

This publication is designed to provide the reader with some basic information about the 2,382 persons, 2,231 men and 151 women, reported in Table 1, Type of Release, as first and rereleases from Wisconsin's correctional facilities for adult offenders during calendar year 1984. N.B.: An additional 147 releases which appear in Table 1 have been excluded from consideration both in the text and in statistical tables 2 through 22. These include 51 men and 5 women released after the completion of probation, parole, mandatory release, or special action early release revocation hearings, 88 men and 2 women released after the completion of alternative to revocation contracts, and 1 man released after being erroneously admitted.

First releases, in the context of this bulletin, are those individuals released from institution supervision for the first time following an admission with a new sentence not associated with a violation and revocation of parole, mandatory release, or special action early release field supervision. Rereleases are those persons released from institution supervision following a return to the institution as a parole, mandatory release, or special action early release violator with or without a new sentence. Information about the facilities from which persons were first or rereleased as well as the manner of release; i.e., parole, direct discharge, etc. can be found in Table 1. The map and key which precede this text are included to provide information about the geographic location and security rating of the facilities from which offenders were first and rereleased during calendar year 1984. "Contr. Fac." are not marked on the map. These are facilities in which offenders are serving Wisconsin sentences under contractual arrangements and include federal correctional institutions, the Milwaukee County House of Corrections, other county jails in Wisconsin, and correctional institutions operated by the state of Minnesota. For those interested in trend data, information concerning men first and rereleased during the period 1980-1984 can be found in Appendix Tables A and B with data about first released women available in Appendix Table C. The small number of rereleased women makes the inclusion of trend data meaningless.

First Released Males

There was little change in the number of men categorized as first releases with 1,743 being reported during calendar year 1984 as compared with the 1,758 recorded the previous year. The majority (97.8 percent) were released to some type of supervision in the field; i.e., parole, special action early release, or mandatory release. Nine were discharged upon expiration of sentence, 28 were discharged by order of a court, and two died while incarcerated. Almost one-half (48.4 percent) of the men had been serving sentences for either unarmed burglary (32.3 percent), armed robberty (8.6 percent), or theft (7.5 percent). Just over one-third (34.1 percent) of the first releases were considered to be assaultive offenders with just under one-tenth (8.7 percent) being classified as both assaultive and sexual offenders. The average (mean) length of time institutionalized for first releases as a group was 23.1 months; the median, 18.5 months. Men first released after institutionalization for unarmed burglary, armed robbery, or theft were found to have been incarcerated for an average (mean) of 20.0, 40.9, or 15.9 months respectively.

Figure 1
Male First And Rereleases From
Wisconsin Adult Correctional Facilities
Intended County Of Residence
Calendar Year 1984

A wide range of educational and vocational programs are available to persons confined in Wisconsin's correctional facilities for adult offenders. Many persons who come into correctional facilities are deficient in basic skills such as reading, writing, and arithmetic. Just under one-fifth (17.7 percent) of the men reported as first releases during 1984 took part in adult basic education classes while incarcerated. Less than one-tenth (7.0 percent) of the men took part in a formal high school program prior to being released. However, 28 men earned high school diplomas while imprisoned. One-fifth (20.1 percent) of the men obtained GED or HED certificates prior to release. Participation in vocational or apprenticeship programs was reported for one-third (33.0 percent) of the releases while just under one-fifth (17.0 percent) took part in work release programs. Participation in programs designed to assist people in dealing with problems related to the use of alcohol and/or other drugs was noted for more than two-fifths (43.5 percent) of the men first released in 1984.

The majority (92.4 percent) of the men planned to live somewhere in the state of Wisconsin while the remainder, with the exception of one man who intended to reside in a foreign country, planned to live in other sections of the United States. Roughly 7 out of 10 (68.0 percent) of the men who decided to remain in Wisconsin following release indicated that they planned to reside in the southern one-third of the state; i.e., the Southern, Southeastern, or Milwaukee Regions. (See Table 22 and Figure 1.)

Rereleased Men

The number of men reported as rereleases rose slightly (4.7 percent) from 466 in 1983 to 488 in calendar year 1984. Two-thirds (65.6 percent) of the men left the institutions on mandatory release status, just under one-fifth (19.1 percent) received paroles or special action early releases, while the remainder, excluding two men who died while imprisoned, were directly discharged or discharged by court order.

Over one-half (56.5 percent) of the men rereleased during 1984 had been sentenced for one of three offenses; unarmed burglary (34.7 percent), armed robbery (14.6 percent), or forgery (7.2 percent). The average (mean) length of time spent in the institution just prior to rerelease was 11.1 months while the average (mean) time incarcerated since last institutionalization as a new admission was 57.4 months. (See Tables 5 and 6.) Two-fifths (40.8 percent) of the men rereleased in 1984 were classified as assaultive offenders or assaultive offenders who were also categorized as either sex or drug offenders.

Almost one-fifth (18.2 percent) of the men took part in GED or HED programs prior to rerelease with 56 (11.5 percent) being granted certificates of successful completion. Less than one-tenth (8.6 percent) took part in adult basic education programs while 24 men, 3 of whom were granted diplomas, participated in high school programs.

Wisconsin was reported to be the intended place of residence for 9 out of 10 (92.1 percent) of the men rereleased during 1984 with the remaining men planning to live elsewhere in the United States. The majority (76.9 percent) of the men who planned to live in Wisconsin intended to reside somewhere in the 19 county area that makes up the southern third of the state. (See Figure 1 and Table 22.)

First and Rereleased Women

An increase of 11.1 percent in the number of women reported as first releases was noted in 1984 when 130 as contrasted with the 117 reported in 1983 left the institutions. The majority (96.9 percent) were released to parole, mandatory release, or special action early release field supervision, two were discharged by court order, one received a direct discharge, and one received a commutation of sentence. The number of women reported as rereleases almost doubled from 11 in 1983 to 21 in 1984; an increase of 90.9 percent. Two of the rereleased women were directly discharged from the institution upon the completion of their sentences while the remainder were released to some type of field supervision.

Women categorized as first releases had most often been sentenced to prison for forgery (25.3 percent) and theft (15.4 percent); rereleases for forgery (28.5 percent) and armed robbery (23.7 percent). About two-thirds (67.7 percent) of the first releases and just over three-fifths (61.9 percent) of the rereleases were not classified as being assaultive, sex, or drug offenders. Women who were classed as first releases had spent an average (mean) of 16.8 months in the institutions while rereleases, during this stay, spent an average (mean) of 14.1 months.

Just over one-third (35.4 percent) of the first releases took part in adult basic education programs while incarcerated with one-fifth (20.0 percent) completing the course of study. One-fourth (24.6 percent) of the first releases obtained GED or HED certificates prior to release. The majority (85.7 percent) of the women rereleased during 1984 did not take part in either adult basic education or GED/HED programs. The only person to receive a high school diploma during 1984 was a rerelease. Two women who were first releases during the year took part in formal high school programs during incarceration but did not obtain diplomas. Three out of ten women first or rereleased during 1984 took part in work release programs while incarcerated while one-fourth (24.6 percent) of the first released women participated in off-grounds study release programs. Over one-half (53.0 percent) of the first releases took part in programs designed to deal with problems relating to the use of alcohol and/or other drugs.

Milwaukee County was reported as the post-release residence for somewhat more than one-third (36.8 percent) of the first releases and almost three-fifths (57.1 percent) of the rereleases. It is interesting to note that only 19 women, 17 first and 2 rereleases, intended to live elsewhere in the United States as opposed to residing in Wisconsin.

Juveniles Admitted to
Division of Corrections Juvenile Institutions
Calendar Year 1984

The sections of Wisconsin's Children's code that regulate the treatment of juvenile offenders rest on the premise that children found to be delinquent and in need of treatment must receive the necessary care in a setting that is as unrestrictive as possible but will, at the same time, address the needs of the child and the concerns of society. Therefore, children who have been adjudicated delinquent cannot be admitted to Ethan Allen and Lincoln Hills Schools, the Division of Corrections' facilities for juvenile offenders, unless (1) they have been found delinquent because of an act which would have resulted in a sentence of at least six months if committed by an adult and (2) circumstances indicate that the needs of both the child and society can best be met in a secure and custodial treatment setting.

This publication is designed to provide the reader with some basic information about the 707 youths reported in Table 1, Type of Admission, as new admissions and returns from aftercare supervision during calendar year 1984. It should be noted that Table 1 does not present an unduplicated count since 99 of the youths reported as returns from aftercare supervision were initially admitted to await the outcome of aftercare supervision revocation hearings, had their aftercare status revoked, and had their admission status changed to reflect a return from some type of aftercare supervision. For this reason, the 155 children, 143 boys and 12 girls, admitted pending the outcome of revocation hearings have been excluded from consideration in Tables 2 through 18. These tables present a variety of data including age on admission, race and ethnicity, major delinquent act, etc. and are arranged so that comparisons can be made beteen those admitted to Ethan Allen and Lincoln Hills Schools.

Juvenile Boys

A total of 638 boys, 533 new admissions and 105 returns from aftercare supervision, were reported during calendar year 1984; an increase of 10.2 percent over the previous year when 579 admissions including 98 returns from aftercare were noted. Approximately two-thirds (65.7 percent) of all the admissions were from the Milwaukee Region (Milwaukee County) and the Southeastern Region which is made up of Kenosha, Ozaukee, Racine, Walworth, Washington, and Waukesha Counties. The Northern and Western Regions, 36 out of the state's 72 counties, were responsible for the commitment of slightly more than one-tenth (12.6 percent) of the year's admissions. (See Figure 1.) Milwaukee (314 cases), Racine (42 cases), Kenosha (31 cases), Dane (26 cases), Outagamie (19 cases), Brown (16 cases), Rock (15 cases), Marathon (14 cases) and Waukesha (14 cases) counties accounted for somewhat over three-fourths (77.0 percent) of all admissions.

Boys received at Ethan Allen School were reported to have an average (mean) age of 16.0 years at the time of admission while those admitted to Lincoln Hills School were slightly younger with a reported average (mean) age of 15.7 years. Slightly over one-half (54.4 percent) of all boys admitted during 1984 were from White family backgrounds. Just under two-fifths (38.4 percent) were reported to be Black while less than one-tenth (5.5 percent) were of Native American parentage. Thirty-four boys (5.3 percent) came from families with a Hispanic

ethnic background. About two-thirds (67.9 percent) of the boys were born in the State of Wisconsin; just over three-tenths (31.0 percent) were born in other sections of the United States, and 6 were born in other countries.

Theft (23.0 percent), armed robbery (18.6 percent), and assault/battery (14.6 percent) were reported to be the major delinquent acts committed just prior to admission by boys received at Ethan Allen School during calendar year 1984. The major delinquent acts most often reported for those admitted to Lincoln Hills School were unarmed burglary (33.3 percent), auto theft (14.5 percent), and theft (11.5 percent). Less than one-fifth of the boys admitted to Ethan Allen (16.6 percent) and Lincoln Hills (17.1 percent) Schools were found to be without problems relating to assaultiveness, drugs and/or alcohol, or sexual behavior. About two-thirds (66.1 percent) of the boys admitted to Ethan Allen as contrasted with somewhat more than two-fifths (44.8 percent) of those received at Lincoln Hills were found to have problems relating to assaultiveness either singly or in combinations with problems involving drugs and/or alcohol or sexual behavior. It should be noted that all boys admitted to Ethan Allen and nine-tenths (90.2 percent) of those sent to Lincoln Hills had previously been supervised by County agencies because of delinquent behavior.

Juvenile Girls

Lincoln Hills School, Wisconsin's only coeducational correctional facility, provides residential care and treatment for all girls committed to state facilities for juvenile offenders. Sixty-nine girls, 59 new admissions and 10 returns from aftercare were reported during calendar year 1984; an increase (27.8 percent) over the previous year when 54 girls entered the institution. A visual depiction of admissions by county and region of commitment is presented in Figure 2. It is interesting to note that the Northern, Eastern, and Western Regions, which include 53 (73.6 percent) of the state's 72 counties, were responsible for the commitment of three-tenths (29.0 percent) of the admissions during calendar year 1984. The Milwaukee Region, i.e., Milwaukee County and the Southeastern Region which is made up of Kenosha, Ozaukee, Racine, Walworth, Washington, and Waukesha Counties accounted for one-fourth (24.6 percent) and three-tenths (29.0 percent) of all admissions respectively.

The average (mean) age reported for all admissions during 1984 was 15.7 years. All girls admitted, with the exception of 9 (13.1 percent) who were born elsewhere in the United States, were native-born Wisconsinites. Over one-half (56.5 percent) of the girls were reported to be White while about three-tenths (31.9 percent) were from Black family backgrounds. Girls with a Native American heritage made up one-tenth (10.1 percent) of the admissions and two girls, one White and one Native American, also were reported to be from families with a Hispanic ethnic background.

The major delinquent acts most often committed just prior to admission by girls who entered the institution during calendar year 1984 were assault and/or battery (21.7 percent), theft (20.3 percent), and unarmed burglary (14.5 percent). Assessments made upon admissions indicated that one-tenth (10.1 percent) of the girls were without problems relating to assaultive behavior, sexual behavior, or drug and/or alcohol usage. One-half (50.7 percent) of the girls were found to have problems involving the use of drugs and/or alcohol

either alone or in combination with other problem areas. Just over one-third (34.8 percent) were reported as having problems with assaultive behavior alone or in conjunction with drug and/or alcohol problems or sexual problems. Nine out of ten (89.9 percent) of the girls admitted during 1984 had previously been supervised by county agencies because of delinquent behavior.

Juveniles Released From
Division of Corrections Juvenile Institutions
Calendar Year 1984

This publication is designed to provide the reader with a variety of information about the 615 juveniles, 552 boys and 63 girls, reported in Table 1, Type of Release, as first or rereleases to some type of aftercare supervision, direct discharges, or discharges by court order from Ethan Allen or Lincoln Hills Schools during calendar year 1984. Boys noted in Table 1 as being released following supervision for other jurisdictions (4 non-Wisconsin cases) and 58 boys and 5 girls released following the completion of aftercare supervision revocation hearings have been excluded from Tables 2 through 16 and from further discussion in the text. Information about personal characteristics such as race and ethnicity, age on release, and intended county of residence, etc., as well as data about program participation during institutionalization can be found in Tables 2 through 16 while Figures 1 and 2 offer a visual depiction of intended county of residence following release.

Juvenile Boys

A total of 552 boys, 468 from Ethan Allen and 184 from Lincoln Hills School, were released during calendar year 1984; a decrease of 16.1 percent from 1983 levels when 658 releases were recorded. Just over three-fourths (75.9 percent) of those leaving the institutions during 1984 were classified as first or rereleases to aftercare supervision by either the Division of Corrections, county agencies, or under the auspices of the TRY program. About one-fifth (19.8 percent) received direct discharges while the remaining 4.3 percent were discharged by order of the juvenile court.

Boys released from Ethan Allen had spent an average (mean) of 8.9 months in the institution with a shorter period of institutionalization, 8.0 months, reported for those released from Lincoln Hills. The average (mean) age for all releases was 16.7 years with boys from Ethan Allen being slightly older (16.8 years) and those from Lincoln Hills being slightly younger (16.5 years). Just under one-half (47.5 percent) of all boys released during calendar year 1984 planned to take up residence in the Milwaukee Region; i.e., Milwaukee County. It should be noted that 9 out of 10 boys (94.2 percent) planning to reside in Milwaukee County were released from Ethan Allen School. Seven out of 10 (70.5 percent) of those who were released from Lincoln Hills School intended to reside in the Eastern (30.6 percent), Northern (21.3 percent), or Western (18.6 percent) Regions of the state. Only four of the boys, three from Ethan Allen and one from Lincoln Hills, were headed for placements in other parts of the United States. (See Table 2, Figure 1.) Somewhat more than one-half (54.8 percent) of the boys released in 1984 were White while Blacks and Native Americans made up almost two-fifths (37.5 percent) and less than one-tenth (6.2 percent) of the total group. Seven boys were reported to be from Hispanic cultural and ethnic backgrounds.

Slightly more than two-fifths (43.5 percent) of the boys released from Ethan Allen and just under one-half (48.3 percent) of those who left Lincoln Hills took part in formal high school programs during institutionalization. High school diplomas were granted to three boys prior to release. Approximately two-fifths (37.8 percent) of the boys participated in GED or HED programs prior

to release with 147 of the 209 (70.3 percent) who took part receiving the appropriate certificate. Prior to release about seven-tenths (69.8 percent) of the boys from Ethan Allen and two-thirds (66.3 percent) of those from Lincoln Hills were reported to have participated and achieved satisfactory performance in basic education programs. It was reported that slightly less than one-half (47.4 percent) of the boys participated in programs designed to help them deal with problems relating to the use of alcohol and/or other drugs prior to release from institution supervision.

Juvenile Girls

Lincoln Hills School, the only coeducational facility operated by Wisconsin's Division of Corrections, reported the release of 63 girls during calendar year 1984; an increase of 10.5 percent from the previous year when 57 girls left the institution. The majority (84.1 percent) were released to some type of aftercare supervision with the remainder being divided equally between those discharged directly and those discharged by order of the court. The average (mean) length of stay for girls released during 1984 was 7.0 months; the average (mean) age at release was found to be 16.3 years.

Almost three-fifths (58.7 percent) of the girls were reported to be White with just over one-fourth (28.6 percent) being from Black backgrounds. Native Americans made up less than one-tenth (7.9 percent) of the releases while 4.8 percent were reported to come from a Hispanic ethnic and cultural background. Nine out of 10 girls (93.7 percent) intended to live somewhere within the state of Wisconsin following release while the remaining four girls intended to live elsewhere in the United States. Five counties, Dane (13 cases), Milwaukee (11 cases), Racine (6 cases), Kenosha (4 cases), and Outagamie (4 cases) were noted as the intended residence for three-fifths (60.3 percent) of the girls. The 19 counties that make up the Southern, Southeastern, and Milwaukee Regions were the chosen residence for 6 out of 10 (63.5 percent) of the girls released in 1984 while the Eastern, Western, and Northern Regions of the state, covering 53 counties, were cited as the expected residence for only 3 out of 10 (30.2 percent) of the girls. (See Figure 2, Table 2.)

Just under three-fifths (57.1 percent) of the girls, prior to release from the institution, took part in programs designed to assist them in dealing with problems relating to the usage of alcohol and/or drugs. Participation in high school programs at the ninth or tenth grade level while at Lincoln Hills was reported for almost one-half (47.6 percent) of the girls released during 1984. Nineteen girls took part in GED or HED programs with 11 receiving certificates of successful completion. Only 6 girls (9.5 percent) were reported to have taken no part in basic education programs prior to release.

Fiscal Year Summary Report
# of Population Movement
1985

This publication presents, for fiscal year 1985, a compilation of information previously published on a monthly basis about the volume and movements of offenders for whom Wisconsin's Division of Corrections had supervisory responsibility. Table 1 contains movement and average daily population data for correctional facilities for adult offenders including the Wisconsin Resource Center and facilities in which Wisconsin offenders were housed under contractual agreements. The latter can be found in the columns labeled "contr. fac." and include the Milwaukee County House of Corrections, the Dane County Ferris Center, other county jails in Wisconsin, federal correctional facilities, and correctional institutions operated by the State of Minnesota. Information about the average daily populations and the movements into and out of Ethan Allen and Lincoln Hils Schools, the two state-operated facilities for juvenile offenders, may be found in Table 2 with fiscal year information about youth aids appearing in Table 2-A. Average daily population and movement data about offenders on probation and parole supervision and information about absconders can be found in Tables 3 and 4 respectively. For those interested in trend data average daily population figures for both institution and probation and parole cases for the fiscal years 1981-1985 are presented in Table A. These average daily populations were arrived at by computing average daily populations for each month of the fiscal year, totaling the results, and dividing by 12 to obtain the fiscal year average daily population. It should be noted that information about absconders has been excluded from Table A.

The Division of Corrections was responsible for the supervision of 33,346 persons on June 30, 1985; an increase of 4.9 percent over the 31,787 cases under supervision on July 1, 1984. The population confined in facilities for adult offenders increased 5.3 percent from 4,779 at the start to 5,034 at the end of fiscal year 1985. Juvenile institution resident populations, which decreased 3.7 percent during fiscal year 1984, increased 18.9 percent from 471 on July 1, 1984 to 560 on June 30, 1985. These population figures do not, however, include institutionalized adults and juveniles reported as absent in footnotes for Tables 1 and 2. The probation and parole caseload resident population rose from 23,908 at the start to 24,846 at the end of fiscal year 1985; an increase of 3.9 percent. The absconder caseload increased from 2,629 to 2,906 (10.5 percent) during the same time period.

An examination of Table A indicates the average daily population of all offenders supervised by the Division of Corrections, which has been increasing steadily for the past five years, reached a high of 29,046 in fiscal year 1985. This represents an increase of 4.5 percent over 1984's previous high of 27,802 and a 20.3 percent increase over the five-year low of 24,142 reported in fiscal year 1981. During each of the five years, 8 out of 10 cases represented in the overall average daily population were supervised in the community with the remainder being institution cases.

C-60A/F14

The average daily population of offenders confined in adult and juvenile correctional facilities rose steadily from a low of 4,301 in fiscal year 1981 to a high of 5,388 in fiscal year 1985; an overall increase of 25.3 percent. The largest increase noted during the 5-year period was the 9.3 percent from an average daily institution population of 4,688 in fiscal year 1982 to an average daily population of 5,124 in fiscal year 1984. The increase from an average daily institution population of 5,124 in fiscal year 1983 to an average daily institution population of 5,194 (1.4 percent) in 1984 was the smallest during the five-year period. The largest increases occurred in the adult correctional facilities which increased steadily from a low average daily population of 3,827 in fiscal year 1981 to a high of 4,883 in fiscal year 1985; an overall increase of 27.6 percent. The 10.6 percent increase from an average daily adult institution population of 3,827 in fiscal 1981 to 4,234 in fiscal 1982 was the highest between-year increase noted during the five-year period. The juvenile institution average daily population, which reached a low of 445 in fiscal year 1984, climbed to a high of 505 in fiscal year 1985; an increase of 13.5 percent.

Community supervision average daily populations; i.e., persons on probation, parole, and aftercare, climbed steadily during the five-year period reaching a high of 23,658 in fiscal year 1985. Probation average daily populations rose from 16,895 in fiscal 1981 to 20,105 in fiscal 1985; an increase of 19.0 percent. The bulk of the increase was in the area of adult probation where the average daily population rose from 16,895 in 1981 to 20,105 in 1985; an overall increase of 19.0 percent. Parole average daily populations also increased steadily during the five-year period reaching 3,553 in fiscal year 1985; an increase of 20.6 percent over the 2,946 reported in fiscal year 1981. Again, the largest increase was in the area of adult parole where average daily populations rose from 2,390 in fiscal year 1981 to 3,197 in fiscal year 1985; an increase of 33.8 percent. Juvenile aftercare average daily populations declined steadily from 306 in 1981 to 155 in 1985; a decrease of almost one-half (49.4 percent). It should be noted that the decrease in youthful offender probation and parole average daily populations are directly relatable to the repeal of the Youthful Offender Statute on July 1, 1978 and that the absence of juvenile probation cases is due to a Department of Health and Social Services policy decision to no longer provide supervision for juveniles placed on probation.

FISCAL YEAR SUMMARY OF MOVEMENTS (1985)

Footnotes

Table 1. Facilities for Adults

/a Excludes 189 males: 8 - psychiatric facilities; 3 - medical hospitals; 32 - court; 8 - jail; 72 - other jurisdictions; 1 - special treatment program; 40 - escapee, at large; 25 — escapee, apprehended.

Excludes 10 females: 1 - medical hospitals; 1 - court; 2 - other jurisdictions; 1 - furlough; 5 - escapee, at large.

/b Excludes 176 status changes for males held pending revocation hearings: 12 - new sentence, adult probation violator; 6 - new sentence, adult parole violator; 13 - new sentence, adult mandatory release violator; 1 - new sentence, special action early release violator; 43 - no new sentence, adult probation violator; 45 - no new sentence, adult parole violator; 48 - no new sentence, adult mandatory release violator; 8 - no new sentence, special action early release violator.

Excludes 10 status changes for females held pending revocation hearings: 7 - new sentence, adult probation violator; 2 - no new sentence, adult probation violator; 1 - no new sentence, adult mandatory release violator.

/c Excludes 461 status changes for males out on temporary absence: 17 - first release, adult parole; 21 - first release, adult mandatory release; 2 - first release, direct discharge; 13 - first release, discharge court order; 1 - first release death; 1 - rerelease, adult parole; 4 - rerelease, adult mandatory release; 3 - rerelease, direct discharge; 1 rerelease, death; 4 - release after completion of adult probation revocation hearing; 2 - release after completion of adult parole revocation hearings; 4 - release after completion of mandatory release revocation hearing; 1 - release after completion of special action early release revocation hearing; 4 - release after completion of alternative to probation revocation contracts; 1 release after completion of alternative to parole revocation contract; 210 - transfer to adult facilities; 12 - transfer to camps and bunkhouse; 2 - transfer to BCC residential centers; 70 - transfer to contract facilities; 9 - authorized absence; 79 - unauthorized absence.

Excludes 30 status changes for females out on temporary absence: 2 - first release, discharge court order; 1 - rerelease, adult mandatory release; 1 - release following completion of adult mandatory release revocation hearing; 16 - transfer to adult facilities; 1 - authorized absence; 9 - unauthorized absence.

Table 2. Juvenile Institutions

/a Excludes 39 - juvenile males absent: 2 - psychiatric facility; 8 - furlough; 13 - trial foster home; 2 - court; 3 - jail; 10 - over-stayed leave; 1 - escapee.

Excludes 4 juvenile females absent: 4 - over stayed leave.

/b Excludes 81 status changes for juvenile males held pending revocation hearings: 72 return from state aftercare; 3 - return from county aftercare; 6 - return from TRY program.

Excludes 5 status changes for juvenile females held pending revocation hearings: 4 - return from state aftercare; 1 - return from county aftercare.

/c Excludes 527 status changes for juvenile males out on temporary absence: 149 - first release, state aftercare; 113 - first release, county aftercare; 36 - first release, direct discharge; 10 - first release, discharge court order; 29 - rerelease state aftercare; 8 - rerelease, county aftercare; 1 - rerelease, TRY program; 10 - rerelease, direct discharge; 4 - rerelease, discharge court order; 3 - release after completion of state aftercare revocation hearing; 16 - transfer to juvenile facility; 41 - authorized absence; 99 - over-stayed leave; 7 - escape; 1 - release of not-Wisconsin case.

Excludes 79 status changes for juvenile females out on temporary absence: 13 - first release, state aftercare; 25 - first release, county aftercare; 1 - first release, direct discharge; 1 - rerelease, state aftercare; 1 - rerelease, county aftercare; 2 - rerelease, direct discharge; 9 - authorized absence; 27 - over-stayed leave.

1985 Calendar Year Summary of Population Movement

The Division of Corrections is responsible for the operation of Wisconsin's correctional institutions for adult and juvenile offenders as well as for the supervision of offenders residing in the community; i.e., those serving probation sentences or those released from the institutions to parole, mandatory release, special action early release, or juvenile aftercare supervision. This publication is designed to provide information about the volume and movements of the various types of offenders for whom the Division of Corrections had responsibility during calendar year 1985. Table 1, Facilities for Adults, provides a summary of the volume and types of movements into and out of facilities for adult offenders. The column labeled "contr. fac." contains movement information about offenders housed under contractual arrangements in correctional institutions operated by the state of Minnesota, federal correctional facilities, the Milwaukee House of Corrections, the Ferris Center (Dane County Huber Law facility), and other county jails in Wisconsin. It should be noted that the Wisconsin Resource Center (column WRC) is operated by the Division of Care and Treatment Facilities. Information about movements into and out of Ethan Allen and Lincoln Hills Schools, the state's facilities for juvenile offenders, can be found in Table 2 while summary data about Youth Aids is included in Table 2-A. Probation and parole services data and information about absconders from field supervision can be found in Tables 3 and 4 respectively. For those interested in trends, the average daily populations for probation, parole, and institution cases for calendar years 1981 through 1985 are presented in Table A.

The populations for which the Division of Corrections was responsible increased 3.2 percent from 32,453 on January 1 to 33,475 on December 31, 1985. Adult facilities populations, which stood at 4,845 at the start of the calendar year, rose to 5,241 on December 31; an increase of 8.2 percent. The population resident in institutions for juvenile offenders rose 9.9 percent during the same time period with 518 residents reported on the first and 569 reported on the last day of the year. It should be noted that these figures do not include adults and juveniles reported as being absent in footnotes for Tables 1 and 2. Probation and parole services case loads remained at about 1984 levels increasing from 24,294 at the beginning to 24,511 at the end of the year; an increase of less than one (0.9) percent. The absconder population rose from 2,796 to 3,154 during calendar year 1985; an increase of 12.8 percent.

Average daily populations for probation, parole, and institution cases for whom the Division of Corrections had supervisory responsibility during the calendar years 1981 through 1985 are made available in Table A. Information about absconder populations is, however, not included. Average daily populations were computed for each month of the calendar year, totaled, and then divided by 12 to arrive at calendar year figures.

The Division of Corrections has, during the past five years, been responsible for the supervision of a steadily increasing average daily population of offenders in the community or in correctional institutions. The average daily population for field and institution cases in calendar year 1981 was 24,705. This figure reached a high of 29,483 during calendar year 1985; an increase of 19.3 percent during the five-year period. The two largest increases, 8.4

1981	24,705	20,204	17,275	16,537	198	12	528	2,929	2,468	36	231	194	4,501	4,028	473
1982	26,777	21,875	18,725	18,088	91	3	543	3,150	2,710	19	219	202	4,902	4,446	456
1983	27,150	21,968	18,680	18,139	25	2	514	3,288	2,913	6	179	190	5,182	4,716	466
1984	28,555	23,280	19,755	19,243	12	1	499	3,525	3,169	3	154	199	5,275	4,796	479
1985	29,483	23,919	20,403	19,880	7	—	516	3,516	3,167	—	151	198	5,564	5,033	531

percent and 5.2 percent, occurred between 1981-1982 and 1983-1984 respectively. Offenders on some type of community supervision status made up four-fifths (80.0 percent) of the average daily population during each of the five calendar years.

Community services, probation and parole, average daily populations rose steadily from a low of 20,204 in 1981 to a high of 23,919 in calendar year 1985; an increase of 18.4 percent during the five-year period. The average daily population of offenders under probation supervision increased 18.1 percent from 17,275 in 1981 to 20,403 in 1985. Parole average daily populations increased 20.4 percent from 2,929 in 1981 to 3,525 in 1984 and remained at about that level with a reported average daily population of 3,516 in calendar year 1985. During the period 1981-1985 the average daily populations for persons on youthful offender and juvenile probation and aftercare supervision decreased steadily. These decreases can be attributed to the repeal of the Youthful Offender Statute, effective July 1, 1978, to the revision of the Children's Code (November, 1978) and to a Department of Health and Social Services policy decision not to accept supervision of juveniles placed on probation under the revised Code.

The overall institution average daily populations rose from 4,501 in 1981 to 5,564 in calendar year 1985; an increase of 23.6 percent. The largest increase (8.9 percent) occurred between 1981-1982 while the smallest (1.8 percent) was noted between 1983-1984. Average daily populations in facilities for adults increased 25.0 percent from 4,028 in 1981 to 5,033 in 1985. Juvenile institution average daily populations reached a low for the five-year period of 456 in calendar year 1982. Since that time, average daily populations have increased steadily reaching a high of 531 in calendar year 1985; an increase of 16.5 percent over the low recorded during calendar year 1982.

* WCCS, the Wisconsin Correctional Center System, became an entity on July 1, 1985. On January 1, 1985, the 443 residents in the column labeled "North WCCS" were located in the following facilities: 109 at Corrections Drug and Alcohol Treatment Center (CDATC), 322 from WCCS (Winnebago, Powers, Black River, Flambeau, Gordon, McNaughton), and 12 from BCC (St. Croix).

The 184 residents in the first column labeled "South WCCS" were located in the following facilities: 99 from WCCS (Oregon, Thompson) and 85 from BCC (Sherrer, Abode, Baker House and St. John's). The 21 females in the second column labeled "South WCCS" were in the BCC Women's Community Correctional Center.

CALENDAR YEAR SUMMARY OF MOVEMENTS (1985)

Footnotes

Table 1. Facilities for Adults

/a Excludes 175 males absent: 8 - psychiatric facilities; 2 - medical hospitals; 20 - court; 23 - jail; 62 - other jurisdictions; 1 - special treatment program; 1 - other absences; 39 - escapee, at large; 19 - escapee, apprehended.

Excludes 11 females absent: 1 - court; 2 other jurisdictions; 7 - escapee, at large; 1 escapee, apprehended.

/b Excludes 125 status changes for males held pending revocation hearings: 6 - new sentence, adult probation violator; 2 - new sentence, adult parole violator; 9 - new sentence, adult mandatory release violator; 29 - no new sentence, adult probation violator; 34 - no new sentence, adult parole violator; 39 - no new sentence, adult mandatory release violator; 6 no new sentence, special action early release violator.

Excludes 6 status changes for females held pending revocation hearings: 2 - new sentence, adult probation violator; 2 - no new sentence, adult probation violator; 1 - no new sentence, adult mandatory release violator; 1 - no new sentence, special action early release violator.

/c Excludes 493 status changes for males out on temporary absence: 14 - first release, adult parole; 24 - first release, adult mandatory release; 1 - first release, special action early release; 2 -first release, adult direct discharge; 16 - first release, adult discharge court order; 6 - rerelease, adult mandatory release; 2- rerelease, adult direct discharge; 1 - rerelease, adult discharge court order; 2 - death; 4 - transfer to Reception Center; 236 - transfer to adult facilities; 9 - transfer to Northern Centers; 8 - transfer to Southern Centers; 65 - transfer to contract facilities; 3 - release following completion of probation revocation hearing; 1 - release following completion of parole revocation hearing; 3 - release following completion of mandatory release revocation hearing; 3 - release following completion of alternative to probation revocation contract; 11 - authorized absence; 82 - unauthorized absence.

Excludes 30 status changes for females out on temporary absence; 1 - first release, adult parole; 1 - first release, adult discharge court order; 17 - transfer to adult facilities; 1 - release after completion of adult mandatory release revocation hearing; 2 -authorized absence; 8 - unauthorized absence.

Table 2. Juvenile Institutions

/a Excludes 30 juvenile males absent: 3 - furlough; 12 - trial foster home; 1 - court; 14 - over-stayed leave.

Excludes 6 juvenile females absent: 2 - trial foster home; 4 - over-stayed leave.

/b Excludes 94 status changes for juvenile males held pending revocation hearings: 82 - return from state aftercare; 5 - return from county aftercare; 7 - return from TRY program.

Excludes 5 status changes for juvenile females held pending revocation hearings: 2 - return from state aftercare; 2 - return from county aftercare; 1 - return from TRY program.

/c Excludes 487 status changes for juvenile males out on temporary absence: 147 - first release, state aftercare; 110 - first release, county aftercare; 26 - first release, direct discharge; 13 - first release, discharge court order; 32 - rerelease, state aftercare; 7 - rerelease, county aftercare; 7 - rerelease, direct discharge; 5 - rerelease, discharge court order; 4 - release following completion of state aftercare revocation hearing; 11 - transfer to juvenile institutions; 28 - authorized absence; 97 - over-stayed leave.

Excludes 83 status changes for juvenile females out on temporary absence: 16 - first release, state aftercare; 20 - first release, county aftercare; 3 - first release, direct discharge; 2 - first release, discharge court order; 2 - rerelease, state aftercare; 3 - rerelease, county aftercare; 1 - rerelease, direct discharge; 12 - authorized absence; 24 - over-stayed leave.

Footnotes (Concluded)

DCI-REC - Dodge Correctional Institution, Reception Center
DCI-PROP - Dodge Correctional Institution, Institution Proper
WCI - Waupun Correctional Institution
GBCI - Green Bay Correctional Institution
FLCI - Fox Lake Correctional Institution
KMCI - Kettle Moraine Correctional Institution
OCI - Oakhill Correctional Institution
Bunkhouse - Minimum Security Bunkhouse
WCCS-North - Wisconsin Correctional Center System-Northern Sector. Created effective July 1, 1985, WCCS-North includes (1) Gordon Center, Black River Center, McNaughton Center, Sanger B. Powers Center, Winnebago Center, and Flambeau Center from the Wisconsin Correctional Camp System, (2) St. Croix Center, previously a part of the Bureau of Community Corrections, and (3) the Drug Abuse Center, formerly the Corrections Drug and Alcohol Treatment Center.
WCCS-South - Wisconsin Correctional Center System - Southern Sector created effective July 1, 1985, includes Oregon and Thompson Centers, both formerly units of the Wisconsin Correctional Camp System, and the Marshall E. Sherrer, Abode, St. John's, Baker House, and Women's Centers, all previously units within the Bureau of Community Corrections.
Contract Facilities - Includes Minnesota Correctional Institutions (Stillwater, St. Cloud, and Oak Park Heights), Milwaukee County House of Corrections, Wisconsin county jails, Ferris Center (Dane County Huber Law facility), and federal institutions in which Wisconsin inmates are housed under contract.
WRC - Wisconsin Resource Center. This facility, which is operated by the Division of Care and Treatment Facilities, opened on January 5, 1983.

Residents in Wisconsin
Juvenile Correctional Institutions
on June 30, 1985
With Five-Year Trends for 1981-1985

Ethan Allen and Lincoln Hills Schools, operated by the Division of Corrections, are Wisconsin's correctional facilities for juvenile offenders. Ethan Allen School, located in southeastern Wisconsin (Waukesha County), provides residential care and treatment for boys, while Lincoln Hills School, located in the northern part of the state (Lincoln County), is the only state-operated coeducational correctional facility. Youths found to be delinquent may be sent to these facilities under provisions of the Children's Code which was revised in November, 1978. The Code states that children who are found to be delinquent and in need of treatment and supervision may be committed to a state-operated correctional institution only if (1) they have been found guilty of an offense which would have resulted in a sentence of at least six months had it been committed by an adult and (2) are deemed to be in need of treatment in a secure custodial setting because of the potential for danger to themselves and/or society. Five hundred and sixty youths who met the criteria noted above were in residence on June 30, 1985; 346 boys at Ethan Allen and 176 boys and 38 girls at Lincoln Hills. These figures represent an increase (18.9 percent) over June 30, 1984 when 471 juveniles, 312 at Ethan Allen and 159 at Lincoln Hills, were in residence. Tables 1 through 11 provide some basic information, including age, race and ethnicity, and major delinquent act prior to admission, about the juveniles in residence on June 30, 1985. Five-year trend data for 1981-1985 can be found in Appendix Tables A and B while Maps A and B display the June 30, 1985 resident population by sex and county of commitment.

Ethan Allen and Lincoln Hills Schools housed a total of 522 juvenile boys on June 30, 1985; an increase of 20.3 percent over the previous year when 434 boys were in residence. Two-thirds (66.3 percent) were at Ethan Allen with the remaining one-third (33.7 percent) located at Lincoln Hills. Residents classified as new commitments made up slightly more than three-fourths (78.6 percent) of the population at Ethan Allen and just under nine-tenths (89.2 percent) at Lincoln Hills. Boys who returned to the institutions following revocation of some type of aftercare supervision made up slightly less than one-fifth (18.2 percent) and almost one-tenth (9.6 percent) of the June 30, 1985

populations at Ethan Allen and Lincoln Hills Schools. Thirteen boys, 11 at Ethan Allen and 2 at Lincoln Hills, were awaiting the outcome of aftercare supervision revocation hearings. Lincoln Hills generally receives boys committed from the 53 counties north of the line drawn across the state on Map A while boys from the 19 counties south of the line are usually received at Ethan Allen. It should be noted that boys may be transferred between these two facilities as case needs dictate. Slightly over one-half (52.5 percent) of the boys in residence on June 30, 1985 had been committed to the institutions from Milwaukee County. Seven counties, Dane (31), Racine (25), Outagamie (17), Rock (13), Waukesha (13), Kenosha (11), and Marathon (11), had committed just under one-fourth (23.2 percent) of the boys. Twenty-five out of Wisconsin's 72 counties were not represented in the resident population. (See Map A and Table 3.) Just under one-half (48.8 percent) of the boys were reported to be White, while Blacks and Native Americans made up respectively over two-fifths (45.4 percent) and less than one-tenth (4.3 percent) of the residents. Thirty-five boys (6.7 percent) came from families with a Hispanic ethnic and cultural background. The average (mean) age for boys at Ethan Allen was 16.2 years; at Lincoln Hills, 16.1 years.

The major delinquent acts most often committed prior to admission by boys in residence at Ethan Allen were found to be armed robbery (21.7 percent), battery (17.6 percent), and theft (17.3 percent). Those in residence at Lincoln Hills had most often committed unarmed burglary (26.2 percent), auto theft (18.2 percent), and battery (9.1 percent) just prior to being admitted. Just under one-fifth (19.7 percent) of the boys at Ethan Allen, as contrasted with less than one-tenth (8.5 percent) of those at Lincoln Hills, were reported to be without any problems relating to assaultiveness, sexual behavior, or drug and/or alcohol usage. Assaultiveness, either alone or in combination with problems relating to sexual behavior or drugs and/or alcohol, was noted among slightly more than three-fifths (62.4 percent) of the boys in residence on June 30, 1985. Difficulties in dealing with sexual behavior was found to be a problem for just over one-tenth (13.5 percent) while drug and/or alcohol problems were found to be present in almost three-tenths (28.0 percent) of the residents.

Thirty-eight girls, 32 (84.2 percent) of whom were categorized as new admissions, were in residence at Lincoln Hills on June 30, 1985. Three of the residents had been reinstitutionalized following revocation of some type of

aftercare supervision, 2 were being supervised for jurisdictions other than Wisconsin, and one was being held pending the completion of an aftercare supervision revocation hearing. Five counties in the southern third of the state, Milwaukee (14), Racine (4), Rock (3), Dane (2), and Waukesha (1), committed just under two-thirds (63.2 percent) of the girls in residence on June 30, 1985. It is interesting to note that only 13 of the state's 72 counties (18.1 percent) had representation in the resident population. (See Map B and Table 3). Exactly one-half (50.0 percent) of the girls were reported to be White while just under one-third (31.6 percent) were Black. The remainder, including one girl from a Hispanic ethnic and cultural background, were Native Americans. The average (mean) age for girls in residence on June 30, 1985 was found to be 15.9 years.

The major delinquent acts most often committed just prior to admission by girls in residence on June 30, 1985 were theft (23.8 percent), battery (15.8 percent), and unarmed burglary (15.8 percent). Less than one-tenth (7.9 percent) of the girls were found to be without problems relating to assaultiveness, drug and/or alcohol usage, and sexual behavior. Just under two-fifths (39.6 percent) were found to have difficulties with assaultiveness while slightly over one-third (34.4 percent) had problems relating to sexual behavior. Drug and/or alcohol related problems, either alone or in combination with assaultive or sexual problems, were noted for more than one-half (55.4 percent) of the residents.

Residents in Wisconsin
Adult Correctional Facilities
on June 30, 1985
With Five-Year Trends for 1981-1985

Wisconsin's Division of Corrections was responsible for the supervision of 5,034 persons, 4,827 males and 207 females, who were confined in correctional facilities for adults on June 30, 1985; an increase of 5.3 percent over the previous June 30 when 4,779 persons, 4,576 males and 203 females, were in residence. Nine out of 10 (91.0) were resident in facilities operated by the Division of Corrections while the Wisconsin Resource Center, a unit of the Division of Care and Treatment Facilities, housed 3.2 percent of the June 30, 1985 resident population. The remainder (5.8 percent) of the resident population was housed under contractual arrangements in federal correctional facilities, the Milwaukee County House of Corrections, Dane County's Ferris Center, other county jails in Wisconsin, and in correctional institutions operated by the state of Minnesota. Information about the location and security level of Wisconsin's correctional facilities can be found on the map which precedes this text.

This bulletin is designed to provide the reader with some basic information; i.e., offense, length of sentence, race and ethnicity, etc. about those residents serving sentences in Wisconsin's correctional facilities for adult offenders on June 30, 1985. Table 1, Admission Status, indicates that 99.1 percent of the persons in residence on that date were serving some type of sentence. These included persons classified as new admissions (82.0 percent), readmissions with new sentences (10.1 percent), and readmissions without new sentences (7.0 percent). The remainder of those in residence (0.9 percent) included 19 males and 2 females confined pending the outcome of parole, mandatory release, special action early release, or probation revocation hearings, 19 males and 1 female serving alternative to revocation contracts, and 1 male voluntary return from mandatory release. Information about these 42 cases has been excluded from the remainder of the descriptive data presented in Tables 2 through 15. The resident population is depicted by sex and county of commitment in Maps A and B. Selected characteristics for males and females in residence on June 30, 1981-1985 appear in Tables A and B.

TABLE A
Selected Characteristics of Adult Male Residents
on June 30, 1981-1985

	1981	1982	1983	1984	1985
Males in Residence on June 30	3,871	4,311	4,499	4,576	4,827
Percent new admissions	82.3	82.4	82.5	82.4	81.7
Percent non-white	41.8	41.5	40.9	40.5	40.5
Median age	26.1	26.1	26.6	27.0	27.5
Median length of sentence (years)	6.0	5.8	5.9	5.9	6.1
Percent Milwaukee County commitment	45.6	43.4	40.8	39.1	38.4
Type of offender					
Not assaultive, sex, or drug offender	38.2	39.2	38.5	38.8	36.5
Drug offender only	3.6	3.7	3.7	4.8	5.5
Sex offender only	0.4	0.4	0.5	0.4	0.4
Drug and sex offender	-	-	-	-	0.1
Assaultive offender only	38.1	34.2	33.9	39.8	39.5
Assaultive and drug offender	0.6	0.6	0.7	1.1	0.9
Assaultive and sex offender	17.0	18.6	19.9	15.0	16.9
Assaultive, sex, and drug offender	2.1	3.3	2.8	0.1	0.2

The number of males resident in correctional facilities for adults, which has been increasing steadily, reached a five-year high of 4,827 on June 30, 1985. This represents an increase of 5.5 percent over June 30, 1984, when 4,576 males were incarcerated. The largest increase during the past five years, 11.4 percent, occurred between 1981 and 1982 while the smallest, 1.7 percent, was noted between June 30, 1983-1984. Males classified as new admissions made up just over four-fifths (81.7 percent) of the June 30, 1985 resident population; a proportion which has remained relatively stable since June 30, 1981. This group is composed of males who received new sentences from the court, those who violated the terms of probation and were institutionalized with or without new sentences, and males who violated the conditions of juvenile aftercare supervision and were incarcerated as adult offenders with new sentences. The average (median) age reported for males in residence on June 30 rose to a five-year high of 27.5 years in 1985 as contrasted with the low of 26.1 years recorded in 1981 and 1982. The average (median) length of sentence rose from a five-year low of 5.8 years in 1981 to a high of 6.1 years on June 30, 1985. Seven-tenths (71.9 percent) of the males in residence on June 30, 1985, had been committed from the 19 counties that make up the Southern, Southeastern, and Milwaukee Regions. (See Map A, Table 6.) The proportion of males committed from Milwaukee County has decreased steadily from a high of 45.6 percent on June 30, 1981 to a low of 38.4 percent on June 30, 1985.

On June 30, 1985, somewhat over one-third (36.5 percent) of the males in residence had been sentenced for offenses not considered to be assaultive, sex, or drug crimes. This is a low for the five-year period with the high occurring on June 30, 1982, when just under two-fifths (39.2 percent) of the residents were classified as non-assaultive, sex, or drug offenders. Males in residence only because of convictions on drug charges made up 5.5 percent of the population on June 30, 1985. This proportion, however, has increased slightly since the low of 3.6 percent reported in 1981. The proportion of residents convicted exclusively of assaultive offenses remained at about the June 1984 level of just under two-fifths (39.5 percent). Somewhat less than one-fifth (16.9 percent) of the males in residence on June 30, 1985, were categorized as being both assaultive and sex offenders; an increase from the five-year low of 15.0 percent noted in 1984.

Assaultive and sex offender	6.3	5.3	6.0	3.5	5.4
Assaultive, sex, and drug offender	-	-	-	-	-

Wisconsin's facilities for female offenders housed a total of 207 residents on June 30, 1985; a 1.9 percent increase over the 203 reported the previous year. The majority (89.9 percent) were classified as new admissions; a proportion that is slightly larger than the five-year low of 87.2 percent recorded in 1984. One-half (50.0 percent) of the females in residence on June 30, 1985, were from non-white family backgrounds. This is an increase over the 1984 low when just over two-fifths (43.8 percent) of the population was reported to be non-white. The average (median) age increased from a low of 27.6 years on June 30, 1982 to a high of 28.9 years on June 30, 1985. The average (median) length of sentence also increased from a low of 3.7 years in 1982 to a five-year high of 5.2 years in 1985. Seven out of 10 (71.6 percent) of the females institutionalized on June 30, 1985, were committed from the 19 county area making up the southern one-third of Wisconsin. Thirty-five of the state's 72 counties (48.6 percent) had no representation in the June 30, 1985, resident population (See Map B, Table 6.).

On June 30, 1985, just over two-fifths (42.2 percent) of the females in residence were serving sentences for the commission of crimes which were not considered to be assaultive, sex, or drug offenses; a low for the five-year period and a decrease of 7.0 percent from the high of almost one-half (49.2 percent) recorded on June 30, 1983. Convictions exclusively for drug offenses resulted in the incarceration of 5.4 percent of the June 30, 1985, resident population while less than one percent had been convicted soley of sex offenses or of both sex and drug crimes. Just over one-half (51.4 percent) of those in residence on June 30, 1985 in contrast with just over two-fifths (40.8 percent) on June 30, 1983, were serving sentences for assaultive offenses only or in combination with drug and/or sex offenses.

RESIDENTS IN WISCONSIN
JUVENILE CORRECTIONAL INSTITUTIONS
ON DECEMBER 31, 1985
WITH FIVE-YEAR TRENDS FOR 1981-1985

Wisconsin's Division of Corrections is responsible for the operation of two correctional institutions for juvenile offenders: Ethan Allen School, which houses boys, and Lincoln Hills School, a coeducational facility. A total of 569 youths, 339 boys at Ethan Allen and 186 boys and 44 girls at Lincoln Hills, were in residence on December 31, 1985; an increase of 9.9 percent over the previous year when 518 juveniles including 45 girls were present. These children were institutionalized under provisions of Wisconsin's Children's Code which states that a child who has been found to be delinquent may be committed to a state-operated juvenile correctional institution if (1) he or she has been found guilty of an offense which would have resulted in a sentence of at least six months if committed by an adult and (2) if he or she is also found to be in need of treatment in a secure custodial setting because of potential danger either to themselves or to society. Tables 1 through 11 contain a variety of information about those in residence on December 31, 1985 while trend data for the years 1981-1985 may be found in Appendix Tables A and B. Illustrations of the geographic distribution of the resident population by sex and county of commitment appear in Maps A and B.

Five hundred and twenty-five boys, 339 at Ethan Allen and 186 at Lincoln Hills were in residence on December 31, 1985; an increase of 11.0 percent over the 473 reported the previous year. Four-fifths (83.0 percent) of the boys in residence on December 31, 1985 were classified as new commitments while those who had been returned following the revocation of some type of aftercare supervision made up less than one-fifth (14.3 percent) of the population. The remainder (2.7 percent) were boys who had been institutionalized pending the outcome of aftercare revocation hearings. Milwaukee County had committed just over one-half (52.8 percent) of the residents while somewhat less than one-fifth (17.2 percent) were committed by Dane (28 cases), Racine (26 cases), Rock (19 cases) and Kenosha (17 cases) counties. It is interesting to note that three-fourths (74.7 percent) of the resident population was committed to the institution from counties located to the south of the heavy line drawn on Map A. Ethan Allen serves, in most instances, as the reception center for boys

committed from this area while those institutionalized from counties north of the line usually undergo the reception process at Lincoln Hills. Boys may be transferred between facilities as individual circumstances and needs dictate. Boys from White or Black racial backgrounds including those from families also reported to have a Hispanic ethnic heritage were equally represented (46.3 percent, 46.5 percent) in the resident population. The average (median) age for the total population was found to be 16.9 years. However, when average (median) age was computed for each institution the boys at Ethan Allen were found to be slightly older (17.0 years) than those at Lincoln Hills (16.8 years). Armed robbery (23.2 percent), battery (18.5 percent), and theft (14.5 percent) were the major delinquent acts most often committed prior to admission by boys in residence at Ethan Allen on December 31, 1985 while those at Lincoln Hills had been most often adjudicated delinquent for the acts of unarmed burglary (29.0 percent), auto theft (13.4 percent), and battery (9.8 percent).

Children who are institutionalized at Ethan Allen and Lincoln Hills Schools are evaluated in an effort to determine individual abilities, strengths, weaknesses, and problem areas. Information obtained during the evaluation process is used in the development of treatment plans which are designed to assist the children in finding ways to cope with or overcome problems as well as to further develop strengths and abilities. Just under one-fifth (17.9 percent) of the boys in residence on December 31, 1985 were without problems relating to assaultiveness, sexual behavior, or the use of drugs and/or alcohol. Somewhat over one-fourth (28.5 percent) were reported to have difficulties with the use of drugs and/or alcohol either singly or in combination with other problems. Assaultiveness, or assaultiveness along with problems relating to sexual behavior or misuse of drugs and/or alcohol, was noted as being an area of difficulty for about three-fifths (61.3 percent) of the resident population. Sexual behavior, either alone or in combination with drug and/or alcohol usage or assaultiveness, was found to be an area of concern for just over one-tenth (12.8 percent) of the residents.

Lincoln Hills School, Wisconsin's only coeducational correctional institution, housed 44 girls on December 31, 1985; one less than reported in residence the previous December. Nine out of 10 (90.9 percent) were reported to be new commitments, three were classified as returns to the institution following revocation of aftercare supervision, and one girl was being supervised for a

jurisdiction other than Wisconsin. Over seven-tenths (72.7 percent) of the girls had been sent to the institution from seven counties, Milwaukee, Kenosha, Racine, Dane, Columbia, Ozaukee, and Waukesha, all of which are located in the southern one-third of the state. Fifty-six of the state's 72 counties (77.8 percent) had no representation in the December 31, 1985 resident population. (See Map B and Table 3). Slightly more than one-half (54.5 percent) of the girls were reported to be White while about one-third (31.8 percent) were Black. The remainder, including one girl from a Hispanic ethnic background, came from Native American families. The average (median) age for girls in residence on December 31, 1985 was 16.6 years.

Theft (25.0 percent), battery (18.1 percent), unarmed burglary (11.4 percent), and commercialized vice/prostitution (11.4 percent) were the major delinquent acts most often committed just prior to admission by girls in residence on December 31, 1985. One-half (50.0 percent) of the girls were found to have difficulty with assaultive behavior alone or in combination with problems relating to drug and/or alcohol usage or sexual misconduct. Problems with sexual behavior in itself or in conjunction with other problem areas was noted for somewhat over one-half (52.2 percent) of the residents while just under three-fifths (59.0 percent) were reported to have difficulties that related to the use of drugs and/or alcohol either singly or in conjunction with problems relating to sexual conduct or assaultiveness.

Residents in Wisconsin
Adult Correctional Facilities
on December 31, 1985
With Five-Year Trends for 1981-1985

The Division of Corrections, on December 31, 1985, was responsible for a total of 5,241 institutionalized adult offenders, 5,001 males and 240 females; an increase of 8.2 percent over the previous year when 4,845 offenders were reported to be in residence. It should be noted that these figures include 300 residents (5.7 percent) housed under contractual agreements in correctional facilities operated by the State of Minnesota and the Federal Bureau of Prisons as well as in the Milwaukee County House of Corrections and the Dane County Ferris Center. The Wisconsin Resource Center, operated by the Division of Care and Treatment Facilities, housed a small portion (3.8 percent) of the resident population. The locations and the security level of the various facilities operated by the Division of Corrections can be found by consulting the map and key which precede this text.

Table 1, Admission Status, indicates that 9 out of 10 persons (99.6 percent) of those in residence on December 31, 1985, were classified as serving sentences handed down by the state's courts; i.e., new adult sentences, returns from adult parole with new sentence, returns from mandatory release without new sentence, etc. The remaining 20 residents, all males, were institutionalized to await the outcome of parole, mandatory release, or special action early release revocation hearings (8 cases), had voluntarily returned to the institution from mandatory release supervision (1 case), or were serving alternative to revocation contracts (11 cases). These 20 males have been excluded from the descriptive data (offense, length of sentence, race and ethnicity, etc.) presented in Tables 2 through 15 as well as from the remainder of the text. Maps A and B provide a geographical description of the population by county of commitment while trend data for the years 1981-1985 can be found in Tables A and B.

TABLE A

The number of males in residence on December 31 continued to rise, reaching a five-year high of 5,001 on December 31, 1985; an increase of 8.0 percent over the previous year when 4,632 males were reported to be in confinement. About four-fifths (81.2 percent) of the males in residence on December 31, 1985, as in past years, were classified as new admissions. This category includes males who received new sentences from the courts, probation violators institutionalized with or without new sentences, and juvenile aftercare violators who received new sentences as adult offenders. Just under two-fifths (39.1 percent) of the males in residence on December 31, 1985, had been committed by courts in Milwaukee County while commitments from Kenosha (345 cases), Racine (323 cases), Dane (304 cases), and Rock (224 cases) counties accounted for roughly one-fourth (24.0 percent) of the population. Further information about the geographic origins of the resident population can be found in Table 6 and Map A.

Residents reported to be from non-White backgrounds made up approximately two-fifths (41.1 percent) of the resident population; a proportion that has remained fairly constant since December, 1981. Less than one-tenth (5.9 percent) of the population on December 31, 1985, were reported to be from Hispanic ethnic and cultural backgrounds. The average (median) age of males in residence, which stood at a five-year low of 26.5 years in 1982, reached a high of 27.7 years in 1985. A sentence of 6.2 years was reported to be the average (median) for those incarcerated on December 31, 1985.

No involvement in assaultive, sex, or drug offenses was noted for slightly less than two-fifths (37.4 percent) of the males in residence on December 31, 1985; a slight decrease from the previous low of 37.7 percent reported on December 31, 1984. Males serving sentences solely for the commission of drug offenses made up less than one-tenth (5.4 percent) of the resident population. This proportion, although low, does represent a high for the five-year period. The proportion of males sentenced solely for sex offenses continued to be less than one percent of the population. Males regarded only as assaultive offenders made up somewhat less than two-fifths (38.3 percent) of the resident population; a decrease from the five-year high of 39.8 percent reported on December 31, 1984. The proportion of residents categorized as both assaultive and sex offenders reached a low of 13.7 percent on December 31, 1983, began to increase, and stood at 17.2 percent on December 31, 1985. This proportion, however, remains lower than the 18.3 and 20.3 percent recorded in 1981 and 1982 respectively.

Assaultive, sex, and drug offender	-	-	-	-	-

Two hundred and forty females were resident in correctional facilities for adult offenders on December 31, 1985; an increase of 12.7 percent over the 213 reported the previous year and a high for the period 1981-1985. The largest increase during the five-year period was 18.0 percent between 1981-1982; the smallest, 4.9 percent between 1983-1984. The majority (94.6 percent) of the females in residence on December 31, 1985, were in facilities operated by the Division of Corrections; i.e., the Taycheedah Correctional Institution (85.0 percent) and the Women's Correctional Center (9.6 percent). Dane County's Ferris Center provided housing and supervision under contractual agreements for the remaining 5.4 percent of the resident population.

First admissions, including females who entered the institution with new sentences or were incarcerated as probation violators with or without new sentences, continued to make up the greater part (93.5 percent) of the resident population. Three-fourths (74.6 percent) of the females in residence on December 31, 1985, were committed to the institution from 12 counties all of which are located in the southern one-third of the state. Thirty-three out of the state's 72 counties (45.8 percent) were not represented in the resident population. Readers interested in data for specific counties or areas of the state will find such information in Map B and Table 6. An average (median) age of 29.3 years was reported for females in residence on December 31, 1985; a high for the five-year period and an increase of 2.3 years over the low of 27.0 years recorded in 1981. Females from non-White backgrounds made up slightly over one-half (52.4 percent) of those in residence on December 31, 1985; a high for the past five years and an increase of 6.7 percent over the low (45.7 percent) noted on December 31, 1984. The average (median) length of sentence has increased steadily from a low of 3.8 years in 1982 to 5.1 years in 1985.

The proportion of females serving sentences for crimes not classified as assaultive, drug, or sex offenses dropped from a high of slightly more than one-half (51.2 percent) in 1982 to a low of just over two-fifths (43.8 percent(in 1985. Females confined soley because of drug offenses made up less than one-tenth of the resident population throughout the years 1981-1985. Residents serving sentences for assaultive offenses, either singly or in combination with sex or drug offenses, made up just under one-half (48.3 percent) of the population on December 31, 1985. It should be noted that this proportion has increased each year since the low of 42.8 percent noted on December 31, 1983.

Offenders Admitted to
Wisconsin Adult Correctional Institutions
Calendar Year 1985

During calendar year 1985 a total of 2,634 persons were admitted to serve sentences in Wisconsin's Division of Corrections-operated institutions for adult offenders; an increase of 5.2 percent over the 2,503 admissions reported in 1984. An additional 201 offenders who entered the institutions during 1985 have been noted in Table 1, Admission Status, but have been excluded from the remainder of this publication because they were temporary in nature. These include 109 males and 7 females who were incarcerated pending the completion of probation, parole, mandatory release, or special action early release revocation hearings, 2 males who voluntarily returned to institution supervision from mandatory release status, 1 female who was erroneously admitted, and 78 males and 4 females who were institutionalized on alternative to revocation contracts.

Tables 2 through 18 contain a variety of descriptive information including offense, length of sentence, age at admission, and race and ethnicity for 1985 first and readmissions. The tables are arranged so that comparisons can be made between both sex and type of admission. Information about the geographic origin of offenders first and readmitted in 1985 can be found in Maps A and B with additional material appearing in Table 4.

Definition of the terms "first" and "readmission" seems to be in order. First admissions fall into three groups. Group 1, new adult sentences, includes those offenders who were not already under some type of Division of Corrections supervision (probation, parole, mandatory release, special action early release) at the time of sentencing. Persons who violated the terms of probation supervision and were then revoked and institutionalized either with or without new sentences make up the second group, while the third group is made up of offenders who violated the conditions of juvenile aftercare supervision, were revoked, and received new sentences as adult offenders. Readmissions are those previously released from Wisconsin's adult correctional facilities to some type of community supervision who violated the terms and conditions of supervision and were revoked and reinstitutionalized either with or without new sentences.

Male First Admissions

The reception center for all males sentenced to Wisconsin's correctional institutions for adult offenders, Dodge Correctional Institution, reported a total of 1,873 first admissions during calendar year 1985. This is a slight increase (2.9 percent) over 1984 levels when 1,821 first admissions were recorded. Somewhat less than three-fifths (57.5 percent) were categorized as first admissions with new adult sentences, one-fifth (20.2 percent) as adult probation violators with new adult sentences, and the remainder (22.3 percent) as probation violators without new adult sentences. Unarmed burglary (25.6 percent), theft (8.1 percent), armed robbery (6.6 percent), and first degree sexual assault (6.1 percent) were the crimes for which males first-admitted in 1985 had most often been convicted and sentenced. The average (mean) length of sentence reported for male first admissions during 1985 was 63.4 months; the median, 42.0 months. These computations do not include those who entered the institution with life sentences. Males convicted of unarmed burglary, theft,

armed robbery, and first degree sexual assault entered the institution with average (mean) sentences of 47.9, 42.1, 111.8, and 111.2 months respectively. First over one-half (51.1 percent) of the first admissions were not classified as assaultive, sex, or drug offenders. Those regarded solely as drug offenders made up about one-tenth (9.1 percent) of the first admissions while less than one percent were categorized only as sex offenders. About one-fourth (24.6 percent) were regarded as assaultive offenders while over one-tenth (14.1 percent) were considered to be both assaultive and sex offenders.

Somewhat more than three-fifths (62.1 percent) of the males first-admitted during 1985 were White while about one-third (34.4 percent) were Black. Offenders from Hispanic ethnic and cultural backgrounds made up only 5.4 percent of the group while those with a Native American heritage accounted for 2.6 percent of the first admissions. Six out of 10 (68.8 percent) of the males first-admitted in 1985 were committed to the institution from counties in the Southern (15.2 percent), Southeastern (19.9 percent), and Milwaukee (33.7 percent) regions. Four of the state's 72 counties, Florence, Iron, Kewaunee, and Vilas, committed no first admissions during 1985. The average (mean) age was found to be 27.1 years; the median, 25.2 years. Eight out of 10 (80.8 percent) males were reported as being single at the time of admission with, in fact, almost two-thirds (64.0 percent) reported as never having been married. Over one-half (55.4 percent) were reported to have no record of previous felony convictions and over two-thirds (68.6 percent) had no previous penal institution experience.

Male Readmissions

Six hundred and five males were readmitted to adult correctional facilities in 1985; an increase of 16.8 percent over 1984 when 518 readmissions were reported. Those who were reinstitutionalized with new sentences following revocation of some type of field supervision made up roughly two-fifths (42.1 percent) of the readmissions, while the remainder (57.1 percent) were returned as violators but did not receive new sentences. The offenses for which readmitted males had most often been institutionalized were unarmed burglary (35.4 percent), armed robbery (13.1 percent), and theft (7.4 percent). The average (mean) length of sentence for males readmitted in 1985 was 99.6 months and the median was 71.8 months. Those sentenced for unarmed burglary, armed robbery, and theft were found to be serving average (mean) sentences of 69.5, 193.7, and 59.9 months respectively. One-half (50.1 percent) of the males were not considered to be assaultive, sex, or drug offenders. Those classified as drug or sex offenders or a combination thereof made up only 5.0 percent of the readmissions. Males categorized as being solely assaultive offenders made up about one-third (32.8 percent) of the 1985 readmissions while just over one-tenth (10.6 percent) were found to be both assaultive and sex offenders. Two-thirds (66.7 percent) of the readmissions were from five counties, all located in the southern one-third of the state. These counties are Milwaukee (42.6 percent), Kenosha (7.5 percent), Racine (6.9 percent), Dane (5.0 percent), and Rock (4.7 percent).

Slightly less than two-fifths (38.4 percent) of the males were aged 20 through 24 years at the time of readmission. Readmissions as a group were found to have an average (mean) age of 28.7 years; a median of 26.9 years. Males from White or White-Hispanic racial and ethnic backgrounds made up just over one-half (52.7 percent) of the readmissions while somewhat more than four-tenths (44.2 percent) were Black or Black Hispanics. The remainder were found to be Native Americans.

Almost 9 out of 10 (85.8 percent) were reported to be single at the time of readmission with just over two-thirds (67.4 percent) reported to have never been married. Just under two-fifths (37.5 percent) were found to have at least two prior felony convictions.

First and Readmitted Females

One hundred and fifty sex females, eight less than in 1984, entered Taycheedah Correctional Institution during calendar year 1985. Nine out of 10 (91.0 percent) were first admissions as contrasted with 1984 when 82.3 percent fell into that category. The proportion of readmitted females decreased from almost one-fifth (17.7 percent) in 1984 to less than one-tenth (9.0 percent) in 1985. Females first-admitted in 1985 were most frequently sentenced for forgery (19.9 percent), theft (18.4 percent), and fraud (5.7 percent); readmissions for theft (33.3 percent) and forgery (20.0 percent). Average (mean) lengths of sentence for first and readmissions were found to be 49.2 and 50.7 months respectively; medians, 41.6 and 41.5 months. Females first-admitted for forgery received average (mean) sentences of 48.9 months while those first admitted on theft and fraud charges entered the institution with average (mean) sentences of 44.0 and 40.5 months. Females readmitted for theft had received average (mean) sentences of 34.8 months with an average (mean) sentence of 38.0 months reported for those readmitted on forgery charges. Just under three-fifths (57.4 percent) of the females first-admitted in 1985 were not considered to be assaultive, sex, or drug offenders. Less than one-tenth (7.8 percent) of the first admissions had been institutionalized for drug offenses only. Over one-fourth (27.7 percent) of the females first-admitted in 1985 were classified as assaultive offenders only while 4.3 percent were categorized as both assaultive and sexual offenders. Over one-half (53.4 percent) of the females readmitted during 1985 were not classified as assaultive, sex, or drug offenders, one-third (33.3 percent) were found to be assaultive offenders, while the remainder (13.2 percent) were considered to be drug offenders. First admissions from five counties, Milwaukee (53), Racine (15), Kenosha (12), Rock (9), and Dane (8), accounted for 69.1 percent of this type of admission during calendar year 1985. Over one-half (53.3 percent) of the females readmitted in 1985 came from Milwaukee (6) and Dane (2) counties. The average (mean) age for first admissions was found to be 29.2 years while the median was 27.7 years. Readmitted females were found to have an average (mean) age of 28.9 years and a median age of 27.9 years. Almost one-half (48.2 percent) of the first admissions were White while somewhat over two-fifths (44.0 percent) were Black. Three-fifths (60.0 percent) of the readmitted females were reported to be Black with the remainder being White. Only three females, one first and two readmissions, were reported to be from Hispanic ethnic and cultural backgrounds. Eight out of 10 of the first and readmitted females were single at the time of entry into the institution. Almost one-fifth (18.4 percent) of the first and one-fifth of the readmissions were married at the time of incarceration.

OFFENDERS RELEASED FROM
DIVISION OF CORRECTIONS ADULT INSTITUTIONS
Calendar Year 1985

A total of 2,181 offenders, 1,678 first and 503 rereleases, left Wisconsin's correctional facilities for adult offenders during calendar year 1985; a decrease of 8.4 percent from the 1,873 first and 509 rereleases reported during 1984. First releases are those offenders released from institution supervision for the first time following admission with a new sentence not associated with violation and revocation of parole, mandatory release, or special action early release supervision. Rereleases are those who are now being released following a return to the institution from a previous period of field supervision which resulted in revocation and reinstitutionalization with or without a new sentence. An additional 130 offenders who were released in 1985 are noted in Table 1 but have been excluded from the remainder of this bulletin. These include 29 males and three females who were released following the completion of probation, parole, mandatory release, or special action early release revocation hearings, 93 males and four females released after the completion of alternative to revocation contracts, and one female released after being admitted in error.

The geographical location of the correctional facilities from which offenders were first and rereleased is displayed in the map preceding this text while the accompanying key provides information about the security level of the various facilities. Table 1, Type of Release by Institution, provides data about the facilities from which offenders were released as well as about the type of release; i.e., parole, direct discharge, special action early release, etc. It should be noted that facilities included in the columns labeled "contr fac" on Table 1 are not marked on the map since they are not operated by the Division of Corrections. These facilities, in which offenders are serving Wisconsin sentences under contractual agreements, include federal correctional institutions, the Milwaukee House of Corrections, the Dane County Ferris Center, and correctional institutions operated by the State of Minnesota. Maps A and B provide a visual display of releases by county of intended residence while trend data for males first and rereleased and females first released during the period 1981-1985 can be found in Appendix Tables, A, B, and C. Trend data for rereleased females is not included since the smallness of the numbers makes such data meaningless.

First Released Males

A total of 1,569 first releases were reported in calendar year 1985; a decrease (11.1 percent) from 1984 when 1,743 males were first-released. The majority (97.0 percent) were released to some type of supervision in the community; i.e., parole, mandatory release, or special action early release. Of the remaining, 15 received direct discharges upon completion of sentence, 31 were discharged by order of a court, and one male died while incarcerated. Unarmed burglary (30.1 percent), armed robbery (8.7 percent), and theft (7.7 percent) were the offenses for which males first released in 1985 had most often been institutionalized. One-fourth (25.7 percent) were considered to be assaultive offenders and one-tenth (10.8 percent) were considered to be both assaultive and sex offenders. Somewhat more than one-half (53.4 percent) of the males first released in 1985 were, however, not regarded as being assaultive, sex, or drug offenders. The average (mean) length of time spent in the institution prior to first release was found to be 24.7 months while the median

was 19.6 months. Offenders first released after institutionalization for unarmed burglary, armed robbery, and theft were found to have spent an average (mean) of 20.7, 48.6, and 15.6 months in the institution prior to release.

Offenders have an opportunity, while incarcerated, to take part in a wide range of educational and vocational programs. Such programming is provided so that interested offenders may develop strengths and skills, which, it is hoped, will enable them to make a more successful adjustment following release. Participation in adult basic education programs was reported for less than one-fifth (15.8 percent) of the first releases with 93 out of 249 males successfully completing the program. Three out of 10 (30.5 percent) of the males took part in programs designed to lead to the acquisition of HED or GED certificates with almost two-thirds (63.7 percent) of those who took part being awarded certificates. Less than one-tenth (8.8 percent) took part in high school programs while incarcerated; however, 25 males were awarded high school diplomas prior to being released. Almost one-third (31.9 percent) took part in some type of vocational training or apprenticeship program while institutionalized and somewhat less than one-fifth (18.6 percent) participated in work release programs during their time in the institutions. Participation in programs designed to assist offenders in dealing with problems relating to the use of alcohol and/or other drugs was reported for over one-third (34.1 percent) of the males first-released in 1985.

Nine out of 10 (89.9 percent) of the males who were first-released from the institutions during 1985 intended to return to living situations somewhere in Wisconsin while about one-tenth (9.9 percent) were going to reside elsewhere within the United States. Two-thirds (65.4 percent) of the males who intended to remain in Wisconsin planned to return to locations somewhere in the 19 counties making up the southern third of the state.

Rereleased Males

Four hundred and eighty-two males, just six less than in the previous year, were rereleased from the state's correctional facilities for adult offenders during calendar year 1985. The majority (71.2 percent) received mandatory releases while one-tenth, including one youthful offender, were released to community supervision on parole or special action early release status. The remainder, excluding one offender who received a pardon and one who died during incarceration, either were discharged directly (83 cases) or by order of the court (four cases).

The offenses for which rereleased males had most often been imprisoned were unarmed burglary (32.3 percent), armed robbery (13.0 percent), and unarmed robbery (7.8 percent). The average (mean) length of time spent in the institution just prior to being rereleased was 18.2 months, the median stay was 10.9 months. Males rereleased in 1985 were found to have spent an average (mean) of 54.6 months and a median of 43.9 months in prison since their last entries as new admissions. Slightly less than one-half (48.3 percent) of the rereleases were not considered to be assaultive, sex, or drug offenders. Very small proportions, 3.3 and 0.6 percents, were classified as drug and sex offenders respectively. The remainder of the males rereleased in 1985 were considered to be assaultive offenders (36.0 percent) or assaultive offenders who also were involved in either sex or drug offenses or both.

Participation in adult basic education programs prior to being rereleased was noted for somewhat more than one-tenth (12.4 percent) of the males. One-fifth (20.7 percent) took part in classes leading toward the attainment of an HED or GED certificate and after testing, 60 males were granted certificates. Four males earned high school diplomas prior to being rereleased. Slightly less than one-fifth (17.4 percent) took part in vocational training or in apprenticeship programs prior to being rereleased. About one-fifth (21.6 percent) of the rereleases became involved in programs designed to deal with problems relating to the usage of alcohol and/or other drugs.

Nine out of 10 (91.6 percent) of the males who were rereleased during 1985 planned to live within the state of Wisconsin, 39 intended to reside elsewhere in the United States, and one planned to live abroad. Almost three-fourths (73.3 percent) of those who planned to live in Wisconsin intended to reside in the southern one-third of the state.

First and Rereleased Females

One hundred and nine females reported as first releases left Wisconsin's correctional facilities for adult offenders in calendar year 1985; a decrease of 16.2 percent over 1984 levels when 130 first releases were reported. All were, with the exception of two females who were first released by court order, released to some type of community supervision. Twenty-one females, as was true in 1984, were rereleased. Fourteen left the institution on mandatory release, two on parole supervision, one was granted special action early release and the remaining four were discharged upon completion of sentences.

Forgery (24.0 percent), theft (12.0 percent), and drug offenses (9.3 percent) were the crimes for which first released females had most often been imprisoned. Almost one-half (47.4 percent) of the rereleased females were serving sentences for either forgery (23.7 percent) or theft (23.7 percent). The average (mean) lengths of stay computed for first and rereleased females were 20.0 and 12.5 months while the medians were 19.6 and 7.8 months. The average (mean) length of time spent in the institution by rereleased females since initial entry as new admissions was found to be 37.7 months; the median, 35.0 months.

Eight out of 10 (83.4 percent) of the first-released and nine-tenths (90.5 percent) of the rereleased females were planning to live in the state, with the others intending to reside in other sections of the country. Those interested in a more specific description of intended residence will find such information in Table 22 with a visual illustration in Map B.

Just over one-third (16.7 percent) of the first and four (19.1 percent) of the rereleased females took part in adult basic education programs while institutionalized. One-fifth (21.1 percent) of the first releases earned GED or HED certificates with an additional 13.8 percent taking part in the program. Six of the rereleased females participated in the program and two attained certificates. High school diplomas were earned by two first-released women during their institutional stay. Just under one-half (47.7 percent) of the first and over one-fourth (28.6 percent) of the rereleased females participated in some type of work release situation prior to leaving the institution. Just under two-fifths (38.5 percent) of the first-released females took part in programs designed to help individuals deal with problems relating to the use of alcohol and/or other drugs. Participation in such programs was also noted for somewhat less than one-half (47.6 percent) of the females rereleased during 1985.
